Built by *passionate* craftsmen Determined to **built** to **perfect** sailing yachts

Faurby – a belief

At Faurby we have built boats for decades. Ever since our founding we have been determined to one thing: we will build boats of the highest quality. This belief is with action built into every boat leaving our shipyard.

When buying a Faurby this belief will be in every detail, and it is exactly this uncompromising approach to quality, that our customers appreciate the most.

Every Faurby is custom built in close cooperation with the future owner. Our individual boat building makes it easy for us to focus the yacht more of less towards cruising, long-distance or performance sailing.

– BUILT TO MEET OWNERS DREAMS –

*Actual model may vary from image shown and may include optional equipment
